

Student Climate Change and Conservation Congress November 1-3, 2016

The Green Herald

Day 2 ~ Date: 02.11.2016

GREEN GUIDELINES FOR SURVIVAL

1. Be a ray of sunshine , to yourself and to others, for a smile is the best way to start a conversation.
2. Speak out your ideas, be an avant-garde even if yours is the lone voice in the wilderness.
3. Realize that the nature is calling you and you have to answer it.
(Pun not intended)
4. When you are at sea, do not fear, you will definitely reach the coast one day. (Caution: Of course you will have to know how to swim.)
5. Look for the forest and not just the trees; you are missing it if you cannot see the big picture.
6. When in deep waters, swim, swim and swim all way up.
7. Make hay while the sun shines, for you never know when the sky will become cloudy and it starts pouring. (Caution: Carry an umbrella.)
8. Start from the grassroot level, for when the roots are strong, the trees can weather any storm.
9. Reach for stars, for men has already set foot on the moon, so why not?
10. Never fear to explore a virgin territory, you might just be missing out on something.
